# SYMBOLOLOGY

- VISIBILITY**  
Blaze fabrics or pieces that provide more visibility during hunts.
- XTRA WARM**  
Extra warm apparel due to increased insulation padding.
- ELASTIC WAIST**  
Elasticated waist on sides of trousers allows a more comfortable fit.
- STRETCH**  
Elastic pieces of fabric placed in hi-movement areas for increased comfort.
- RADIO POCKET**  
Radio pocket and related gadgets.
- 2 WAY ZIP**  
Zips both ways for increased comfort when sitting.
- AMMUNITION BADGE SYSTEM**  
Ammunition badge system.
- VENTILATION**  
Under arms, thighs or upper's back with venting pockets.
- MEDIA PORT**  
Media port on pocket for an easier connection of headphones.
- LOAD STRAP**  
Strap that fixed to cargo pockets' flaps ensures easy access to cartridges for fast reload of gun during shooting.
- BUTTONS FOR SUSPENDERS**  
Buttons for suspenders.
- WATERPROOF ZIP**  
Laminated zips for water resistance.
- DETACHABLE HOOD**  
Detachable hood.
- GAME POUCH**  
Backside game pouch.
- CUT RESISTANT**  
Cut resistant.
- X-GUSSETS**  
Pleats on back that increase mobility in shooting action.
- DOUBLE GAME POUCH**  
Backside double game pouch.
- SUSPENDERS**  
Suspenders.
- NOISELESS**  
Reduced noise with friction of fabrics.
- REINFORCED**  
Reinforced materials used for protection against shrubbery and thorns.
- TRIPLE STITCHING**  
Triple stitching.
- REVERSIBLE**  
Reversible.
- EXTRA REINFORCED**  
Extra-reinforced materials used for higher protection against shrubbery and thorns.
- PRESHAPED KNEES**  
Preshaped knees for increased comfort.
- AKTIVE >FIT<**  
Fitted shape.

**HART**

**osmotech**  
PLUS TECHNOLOGY

Osmotech plus means one step beyond in the waterproofness and breathability of our HART garments. This membrane means high waterproofness (over 10000 mm) and breathability (10000 gr./m<sup>2</sup>). Either laminated to the outshell fabrics or used as a layer, Osmotech plus really improves the comfort of our functional clothing.

**osmotech**  
TECHNOLOGY

When we over-heat, we perspire, regardless of what we are wearing.

At some point, extreme heat, humidity, or heavy perspiration can overload the vapour transmission capacity of any clothing, even a cotton T-shirt. When the system is overloaded, moisture accumulates inside and discomfort often results. Osmotech technology is a fabric mix that includes very breathable outdoor plus high waterproof features. This system is less likely to overload and cause discomfort than less breathable, waterproof products.

**XTretch**  
dynamic

Products under this label contain 4-way or 2-way stretch fabrics constructed with elastic fibers. They are performance-fit outdoor, basically designed for hunting, suitable for hiking and other outdoor activities but also very comfortable for casual wear. You can be sure that our XTRETCH DYNAMIC apparel can handle the pressure of demanding physical activities.

**hardware**  
CONCEPT

Generally speaking, we are comfortable when we are neither shivering nor sweating. Heat is the main source of discomfort. We don't lose or gain cold, we lose or gain heat. With Hardware concept we have targeted the following goal: to develop outdoor sport clothing and footwear equipment the best we can to control heat transfer and gain comfort in any level of activity. We have developed this label as our top Hart range to wear: Hardware. It is our natural Selection.

**COTTON**  
DIAMOND LINE

Cotton Diamond Line (CDL) is a light and cool tough-wearing cotton canvas fabric developed for warm-weather shooting. PU coated to ensure a water-repellent function and Teflon™ coated for strengthened fibres, the breathable cotton yarn is woven tight enough to fend off brush and insects yet light enough to remain cool.

**BLINTEX**

Stretch fabric with elastic components made of a mixture of Nylon, Polyester and Elastane. It is used as protection in garments where we need extra reinforcement, but also freedom of movement to enter areas of dense vegetation.

**comfortemp**  
FREUDENBERG

Innovative Comfortemp® fiberball is the very first padding in the world to be made of individual, yet interconnected, little fiberballs. Insulation properties are 50 to 80 percent better than with conventional paddings. The thermal retention is comparable with down.

**HRT+**

The HRT+ (Hydro - Repellent - Treatment) offers light protection against water and humidity by increasing the surface tension of the fabric, allowing droplets to slide off. The increase of the surface tension improves the fabric's resistance to water saturation, while preserving the breathability of the garment. The HRT+ treatment is free of harmful substances to health and the environment.

**YKK**

YKK uses the most advanced technologies to achieve zippers of the highest quality, resistance and durability. Its use in our garments is a guarantee of a highly reliable closure.

**DRY SYSTEM**

DRY SYSTEM technology delivers following advantages to your garment. Wick dampness away from the body. Breathability. Super lightweight. Quick-drying of the fabric. Easy to care for.

**BAMBOO**

Bamboo fiber is naturally anti-bacterial, highly breathable and environmentally friendly. It is also hypoallergenic, very soft to the touch and comfortable.

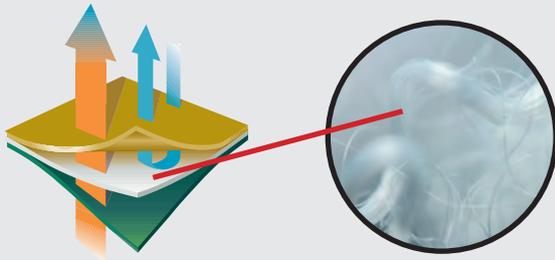

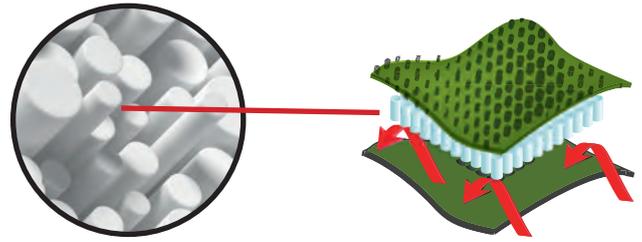

**ANTI BACTERIAL TREATMENT**

The products treated with ABT prevent the growth of bacteria and fungi that cause bad odour.

# MATERIALS AND TECHNOLOGY

## HDI HIGH DENSITY INSULATION

HDI technology (High Density Insulation) conserves body heat and doesn't trap the moisture generated in physical activities. Its high density synthetic microfibers provide a high level of insulation without compromising the weight of the garment. These microfibers trap the warm air molecules generating a natural barrier against low temperatures in order to preserve the heat produced by body. This system maintains its insulation capacity even in humid conditions thanks to its low liquid absorption capacity. This helps the quick drying of the garment.

Windtech products are outdoor or accessories with a weather protection layer function. They are made from air-permeable fabrics such as knit or fleece fabrics laminated to the Windtech membrane to make them windproof. Windtech fleece's high versatility provides greater comfort over a broad range of temperatures and activity levels.

H-AIR knitted fleece technology provides a high degree of insulation. By mapping the body and the characteristics of each area, H-AIR technology uses different levels of fibers (High / Medium / Light) to achieve the perfect balance between insulation, breathability and comfort. Is the perfect choice for upper garments that need to provide that extra warmth requested when temperatures are cool. H-AIR knitted fleece fabric is built with a special mix of fibers that give a lambswool-like effect. This special fabric is processed to produce a melange-effect finish on the outside and a warm and cozy brushed fabric on the inside.

CE - PERSONAL PROTECTIVE EQUIPMENT (PPE. CAT II) - High-Visibility Safety Apparel. All the clothing marked with this logo has been certified and registered as P.P.E. (Personal Protective Equipment) by a Notified Organisation. This certification confirms that the standards and legislation about PPE high-visibility safety apparels have been fulfilled. This standard has been certified in compliance with the PPE rules for the construction, production and maintenance of high-visibility safety apparel to improve hunters safety routinely exposed to the hazards of low daylight visibility while hunting.

CE-PERSONAL PROTECTIVE EQUIPMENT (PPE Cat II) - Wildboard protective pants. This certification gathers the composition of the garment and guarantees its confection with fabric anti-impact resistant to perforations, similar to those caused by the attack of a boar.

EDS (Ergonomic Design System) concept has a target: to develop the most innovative and technically advanced hunting apparel with designs that improve Hart garments' performance in terms of comfort. Our hunting clothing must always follow our anatomy looking for ergonomics in all our movements.

This multifunctional fabric series combines Nylon and Polyester yarns coated with an innovative abrasion resistant and non-slip glue. It's one of the best protective materials for sport and outdoor garments. Its properties include excellent abrasion resistance, non-slip function, tearing resistance and cut-resistant function. Thanks to these qualities, it is a perfect thornproof defense.

Designed for living and built to last, the original durable CORDURA® fabric has proven performance in many of the world's toughest environments. Made with high tenacity air jet textured nylon 6,6 filament yarns in a range of sizes (330D-1000D). Rugged: Excellent resistance to abrasion. Strong: Excellent tear strength. Water Repellent.

The incorporation of graphene has revolutionized the textile industry thanks to its amazing properties. Thermoregulator: The material acts as a filter between your skin and the environment, expelling heat in warmer weather and preserving and evenly distributing body heat in colder climates. It is also antistatic, anti-odor and eco-friendly: Extends the useful life of garments.

HHL Technology™ Vital Protection is a revolutionary and long-lasting insect repellent that can help you avoid nasty, itchy bites or, even worse, serious illness. Vital Protection provides also anti-bacterial functionality, preventing odours, discolouration and degradation, ensuring fresher, more hygienic and durable fabrics. Environmentally friendly, non-irritant and biodegradable.

This Insect Proof (Ticks, House mosquitoes, Asian tiger mosquitoes, Malaria mosquitoes, Yellow fever mosquitoes, Sand flies, Bed bugs, and House dust mites) active component is a synthetic pyrethroid, similar to the substance found in flowers like chrysanthemums. Combined with TANATEX's unique binder system the component has a profound long-lasting effect that can last up to 100 washes. Even after being laundered many times, the textile will not lose its function.

# **MEN'S COLLECTION**

Front cargo zippered pockets with bullet and cartridge detachable badges included inside, and additional zippered handwarmer overpockets.

Adjustable hood with oversized visor can be detached with zip and stored in a mesh hood pocket inside.

Zippered extra-long sides' venting pockets allow to open side seams completely and access to any accessory in your pants or belt.

# ENDURO XHP

Last updating of the essential Enduro concept: sporty noiseless and waterproof jacket with thornproof reinforcements. The ideal jacket for hunting in forest and dense wood.

Sporty noiseless and waterproof pant with thornproof reinforcements. The ideal trousers for hunting in forest and dense wood.

## ENDURO-J XHP

Perfect combination of silence and resistance: strong but noise-free herringbone fabric in torso, ARMOTEX® protection in shoulders and arms plus super-silent fabric in active areas like sleeves' connection and underarms. GPS and radio chest pockets with media port for earphones cable. Front cargo zippered pockets with bullet and cartridge detachable badges included inside, and additional zippered handwarmer overpockets. Zippered extra-long sides' venting pockets allow to open sideseams completely and access to any accessory in your pants or belt. Bloodproof game-pouch with two zippered openings. Adjustable hood with oversized visor can be detached with zip and stored in a mesh hood pocket inside. Adjustable stretch cuffs with lycra cuff-gaiters inside for improved insulation. 2 inside bottom cargo pockets. Waterproof OSMOTECH PLUS membrane and taped seams. High waterproofness (10000mm) and breathability (10000 gr/m²).

**REFERENCE**  
XHENXJ+ Size  
Sizes: S-M-L-XL-XXL-3XL

**COMPOSITION**  
Shell 1: 57% Polyester, 43% Nylon.

Two-way adjustable detachable hood, with pre-shaped visor

Easy-adjustable cuff straps to securely tight your wrist

Side extra-long venting pockets allow the wearer to dump excess heat when needed

# CHAMOIS

Our most advanced windproof softshell jacket for stalking. PIXEL FOREST camouflage breaks the hunter's silhouette with the background and makes it an even continuum with the surrounding nature.

**NEW!**

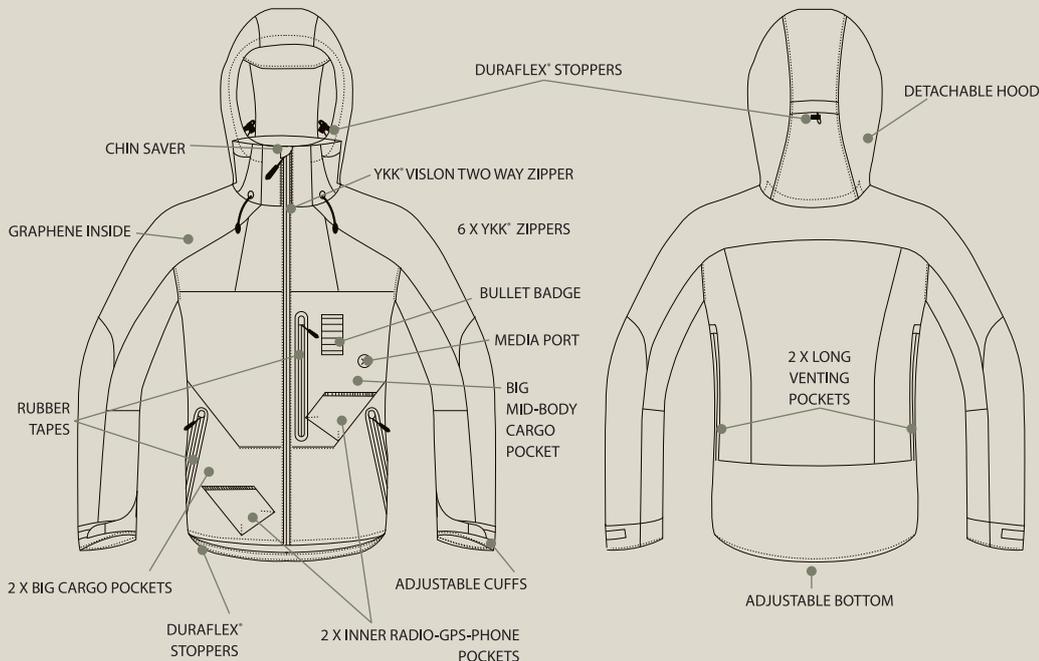

## CHAMOIS-J

Revolutionary 3-layer lightweight, silent and windproof softshell design, due to the lamination of extremely low-noise, 4-way-stretch fabric, TPU windproof membrane and a Graphene layer inside. Strategically mapped mid-body cargo pocket allows super-storage capacity and hides specific pouches for different tools like radio/GPS, mobile, and detachable bullet-loop-line badge. Media port to direct earphones wire inside the jacket. All your accessories will be handy but protected from unwanted snaggings on bushes. Side extra-long venting pockets allow the wearer to dump excess heat when needed, and are an easy entry to your garments or equipment below. Two-way adjustable detachable hood, with pre-shaped visor. YKK zippers. Easy-adjustable cuff straps to securely tight your wrist. Windproof WINDTECH membrane.

ORGANIC COTTON

**BAMBQO**

## SAGA

The bio-polished polyester treatment provides softness and avoids basic cotton polos' usual shrinkage and color bleaching. A double-stitched hem and mesh shoulder vents increase durability and breathability. Soft cotton-bamboo patch with stretch piping inside collar and soft rib-knit banded sleeve cuffs, which will give you more comfort during physical activity. And they won't shrink, bind, or rub.

### REFERENCE

**Olive:** XHSOG + Size

### COMPOSITION

Shell 1: 100% Recycled Polyester.  
 Shell 2: 100% Polyester.  
 Lining 1: 60% Cotton, 40% Bamboo.

Soft, yet incredibly rugged piqué polo. Elegant and technical garment that you will wear on outdoor walks, but also as casual everyday wear.

- **Dry System treatment** wicks away perspiration for comfort on hot days, without damaging your skin.
- **Anti-Bacterial Treatment (ABT)** prevents the growth of bacteria and fungi that cause bad odour.
- **Built-in UPF 50+ sun protection treatment.**

DRY SYSTEM

## BEAR-TS / EARTH-TS / HEART-TS

Fully technical fabric with breathable, moisture-wicking Dry System treatment. Built-in UPF 50+ sun protection garment and organic cotton blended to bamboo fiber that is naturally anti-bacterial, highly breathable and environmentally friendly. Hart distinctive leather badge on sleeve and soft elastic piping on neck with utility loop for hanging give this t-shirt the final touch. Take care to dry carefully as cotton/bamboo will shrink in high temperatures. If you don't want to wash/dry carefully then just size up.  
 Fabric Wt.: 140 gsm.

Shell 1: 57% Polyester, 43% Nylon.  
 Shell 2: 51% Nylon, 49% Polyester.  
 Shell 3: 45% Cotton, 35% Polyester, 20% Nylon.  
 Inside: 50% Fluorofiber, 50% Polyester.  
 Lining 1: 100% Polyester.

# TAUNUS XHP

Warm high-back pants for cold days. Its soft and resistant outer fabric reduces the noise caused by the hunter's movement.

All-year-round lightweight, waterproof and durable trousers.

NEW!

## TAUNUS XHP-TW

Warm HDI 80 insulation and waterproof-windproof OSMOTECH PLUS membrane. Made of silent and resistant micro-toplon with 500D nylon layered reinforcements. 4 waterproof zippered pockets: 2 front, 1 cargo and 1 back pocket. The innovative cargo pocket with a double compartment for easy and quick access to our material. 2 waterproof ventilation zippers and knife pocket. The innovative HLS (Hook & Loop System) gives an easy way to adjust the bottoms tighter, and can be easily removed if it is not needed. High waterproofness (10000mm) and breathability (10000 gr/m<sup>2</sup>).

Silent hunting day rucksack for storing your gun, clothing, and accessories.

**NEW!**

**XT GAMEPACK 45**

- Technical, silent hunting rucksack in brushed polytricot water-resistant fabric.
- Back padded system with anatomically placed breathable mesh pieces to improve comfort and ventilation on the back.
- Adjustable shoulder straps with sliding chest strap with emergency whistle and compass, and a snug waist belt.
- Fitted with an easy access front rifle holding system.
- Bottom pocket's adjustable and retractable pouch for securely holding and adjusting the rifle's butt.
- Center front neoprene pieces to embrace and carefully hold the rifle's forearms and scope.
- Top molle system with adjustable webbing straps to fasten the barrel in its place.
- This full attachment system is padded with a foam layer inside for additional protection and comfort.
- Three levels of zippered pockets on the front deliver a progression in available storage space.
- The in-between stow pocket has a mesh pouch inside for storing an ammunition box and a velcro-detachable bullet badge that fits into some of our jackets' storage systems.
- The zippered pocket, molle system badge and adjustable straps placed over its closure piece can increase big cargo capacity in the largest close-to-body pocket.
- Equipped with functional attachment points and adjustable straps on both sides.
- Two mesh side pockets for bottles or other accessories, and two handy zippered pockets with padded bases on the waist belt for easy-access storage of your tools.
- Pull-out blaze rain cover in the base zippered pocket.

# HART BOOTS

# SKYWALKER

SKYWALKER performs the highest range of our rubber boots collection. High-quality materials for the most demanding hunter. Vulcanized with a super-high percentage of natural rubber (78%) melted with a small percentage of EPDM that improves its abrasion resistance.

**GRAPHENE - Smart Clothing**  
Internal insulation lining in SCR neoprene enhanced with a Graphene lining material. Graphene regulates the temperature of your feet and acts as a filter between your skin and the environment, expelling heat in warmer weather and preserving and evenly distributing body heat in colder climates.

**HAX-SUPPORT**  
A piece that embraces heel and ankle to improve the support and fit of your feet in every step.

(\*) EPDM is a polymer that provides excellent results even in the harshest outdoor environments due to its high performance against atmospheric, acid, ultraviolet, and ozone agents. The resulting compound delivers exceptional tear resistance and comfort properties.

The incorporation of graphene has revolutionized the textile industry thanks to its amazing properties:

- Thermoregulator: Graphene-enhanced fabrics have the potential to reinforce the natural way in which we adjust our body temperature, all while remaining breathable and comfortable.
- Antistatic: Graphene is a natural conductive material, application of a continuous layer of graphene causes electric charges to be dispersed, preventing them from accumulating on the surface.
- Anti-odor: Graphene nanoparticles are free from acute and chronic toxicity and have excellent anti-odor properties.
- ECO-Friendly: Extends the useful life of garments.

## SKYWALKER-NL

Super-light 18" boot, with neoprene shaft and rubber reinforcements and protections around the foot. Side closure with bellows and adjustable strap.

**REFERENCE**  
**VHSK + Size**  
**Sizes: 39-46 EUR**

995 g (43 EUR)

### COMPOSITION

Upper: 4.5mm neoprene + 100% Waterproof natural vulcanized EPDM 78% rubber compound.

Lining: 4.5mm SCR neoprene + Graphene (40%Graphene, 40% Terylene, 20% Elastane).

Insole: Fibre shank.

Footbed: Hart Gel Dynamic Footbed (GDF)

Outsole: Hart LONGWALK ADVANCED TRACTION (LWAT)

### GEL DYNAMIC FOOTBED (GDF)

Dynamic comfort insole with a gel base to optimize cushioning and stability on each step.

### CRADLE MIDSOLE

The midsole's foam delivers a good balance between softness and support that will make each step easier than the previous one.

### LWAT OUTSOLE

(LONGWALK ADVANCED TRACTION) Designed for a better grip in frozen terrain or mud, thanks to its special BG rubber compound.

**MUD HARTWARE** outsole PLUS (MHP)  
Strong but light MH outsole that grips on mud but doesn't get it back home.

**GEL DYNAMIC FOOTBED** (GDF)  
Dynamic comfort insole with a gel base to optimize cushioning and stability on each step.

# TRAKAI

## TRAKAI-NZ

18" rubber boot with 4.5mm neoprene lining. Side zippered closure.

## TRAKAI-BN

12" rubber bootie with 4.5mm neoprene lining.

**REFERENCE**  
VHTBN + Size  
Sizes: 39-46 EUR

999 g (43 EUR)

The TRAKAI rubber boots line uses high quality materials to ensure maximum waterproofness and comfort for the hunter. Vulcanized with a mixture of natural rubber and EPDM, they offer high abrasion resistance. (EPDM is a polymer that stands out for its high resistance to heat and weather conditions). It incorporates reinforcements around the foot, especially at the heel and toes, getting a flexible and durable boot. Internal insulation in 4.5 mm SBR neoprene, which provides greater warm compared to other types of linings. Dynamic comfort insole with gel base to optimize cushioning and stability on each step. Resistant sole that grabs perfectly in the mud, but without taking it attached.

### COMPOSITION

Upper: 100% Waterproof natural vulcanized EPDM  
62% rubber compound.  
Lining: 4.5mm neoprene + 100% Nylon.  
Insole: Fibre shank.  
Footbed: Hart Gel Dynamic Footbed (GDF).  
Outsole: Hart MUD HARTWARE PLUS (MHP).

Our all-year-round use boot. A good compromise between insulation, comfort and durability. ENTRY boot is the perfect choice for hunting, dog training, or any other outdoor activity in rainy weather.

**ALL TERRAIN OUTSOLE (AT)**  
Grip and stability both in muddy and wet terrain.

## ENTRY

18" boot with 4.0mm neoprene lining. Side closure with bellows and adjustable strap.

**REFERENCE**  
**VHEN + Size**  
**Sizes: 39-47 EUR**

# TrekSta

## TECHNOLOGY

### NESTFIT TECHNOLOGY

Unrivaled support, unbelievable comfort. The first shoes truly created to fit the human foot. The NestFIT last was born out of measurements taken from some 20,000 individual feet. The upper, insole, midsole, and outsole mold perfectly to the unique contours of your foot, providing a custom fit unlike any other and eliminating gaps for unmatched comfort.

TREKSTA combines GORE-TEX® membrane with seam sealing process with GORE-SEAM® TAPE. The result is a boot with a guaranteed and durable waterproof protection and maximum breathability.

GORE-TEX® membrane is laminated to the boot's lining fabric to create a high-performance textile.

The expanded PTFE portion of the membrane contains over 9 billion microscopic pores per square inch. These pores are approximately 20,000 times smaller than a drop of water, but 700 times bigger than a molecule of moisture vapour. So whilst water droplets cannot penetrate the GORE-TEX® membrane, moisture vapour (a gas) can easily escape.

 Lining: Waterproof/breathable GORE-TEX® membrane.  
 Lacing: BOA.  
 Last and Production Concept: NESTFIT Technology.  
 Footbed: Moulded double-density EVA and PORON®.  
 Outsole: Hypergrip with ICELOCK anti-slip system and IST system.

The Boa Lacing System provides a dramatic improvement over shoelaces for almost any kind of performance footwear. In BOA, low friction and the Elongated Lace Guides™ combine to eliminate pressure points and provides a unique glove like fit in your boots.

TrekSta footwear with IceLock in outsoles offers the best traction available on ice and snow. Micro-glass filaments are electrostatically aligned in the rubber compound of the sole creating slip-stopping surface tension. The vertically-aligned filaments will be exposed for the life of the sole, ensuring a solid grip as they wear.

TrekSta's IST technology allows your feet to adapt to the abnormal and uneven surfaces through independently moving outsole structure. The principle is simple. Each lugs move independently, and they move vertically up and down. If one lug steps on a foreign object, it automatically moves up to adapt to the surface.

Hypergrip produces the most advanced outsoles in the World implementing exclusive technologies. Key features:

- Superior traction on dry and wet surfaces.
- Exceedingly high wear resistance.
- Stability and lightness.
- It does not degrade or discolor.

Outsole: Hypergrip with ICELOCK anti-slip system and IST system.

## FIBRES

### HYBRID FIBERS:

RecoverWool yarn is made from recycled post-industrial wool and recycled polyester. The combination of this two yarns offers a superb balance between thermoregulation and sweat management.

The new MerinoDry ECO yarn blends and complements the main benefits of superfine merino wool with 100% recycled polyester synthetic fibre that improves moisture management properties and dries faster, also making it more hard-wearing.

### SYNTHETIC FIBRES / HYDROPHOBIC:

Polyester yarn developed by Primaloft® (world number one in artificial thermal insulation in technical garments). It is a soft, thermally insulating, hydrophobic fibre that expels and does not absorb moisture, with 70% of the content now made from recycled resources such as plastic bottles.

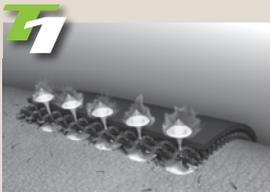

The new Lorpen ECOFresh fibre used in T2 models comes from Unifi® and is composed of 50% Sorbtek® polyester and 50% Repreve® polyester, entirely recycled from plastic bottles. This yarn wicks moisture away from the skin three times faster than rival brands thanks to Catch-Move-Release™ technology.

This is an intimate mix of merino and acrylic that results in a very pleasant and touch yarn that improves comfort.

## TECHNOLOGY

### NEW LIMITS IN SOCK TECHNOLOGY: 3 LAYERS AGAINST BLENDS

Lorpen is the only sock brand in the world that manufactures socks with 3 layers of yarn differentiated (T3 Technology).

It includes:

- A hydrophobic yarn in contact with the skin that wicks the moisture outside keeping the skin dry.
- A hydrophilic yarn in the mid-outer side that absorbs the moisture out of the skin and spreads it for a faster drying.
- A resistant yarn in the outside (usually Nylon) that protects the areas most exposed to friction depending on type and level of activity.

## **B+ HUNTING EXTREME OVER CALF**

4	LEG (CM)	77	78	79	82	84					

XTRA SIZE. LARGE WAIST / SHORT LEG

WOMEN - BODY MEASUREMENTS

HART UPPERS REGULAR SIZE		S	M	L	XL	
1	CHEST (CM)	88	92	96	102	
2	ARM (CM)	59	60	61	62	
HART TROUSERS REGULAR SIZE		36	38	40	42	44
3	WAIST (CM)	70	74	80	82	86
4	HIP (CM)	96	100	104	108	112
5	LEG (CM)	77	78	79	80	81

**CHEST.** Wrap a measuring tape around the highest position of body under your arms.

**ARM.** From shoulder with your arm slightly bent, follow the tape around to your wrist bone.

**WAIST.** Wrap a measuring tape around your natural waistline, or in the position you usually wear your trousers.

**HIP.** Wrap a measuring tape around your hip.

**LEG.** Should be measured from crotch to the floor. For this it is best to take an existing pair of pants you like and measure along the garment inseam from the crotch seam to the hem.
